- 1) VRE is defined as "VRE Bacteraemia Infections" VRE stands for Vancomycin Resistant Enterococcus bacteria
- 2) All hospitals are directed by the Ministry of Health to report 1-4 new cases of VRE as "Less than 5" and the actual number if 0, or 5 or greater.
- 3) The Monthly Rate of VRE is calculated by *The number of new VRE Cases/Number of Patient Days x 1000.*
